- Lint Free

- Removes Fingerprints

The Soda Machine Defender Wipes are commercial grade and designed in a special infused towel format. They are made with proprietary ingredients, to be used instead of spraying chemical substances on the machine (which can migrate to the dispensing area on the machine and be hazardous to customers). Follow the format on front label to know what parts to clean. The Soda Machine Defender wipes will keep the most touched thing in your establishment perfectly clean from contamination. One heavy duty wipe towel will clean an entire soda machine from top to bottom.
