

FloorSink

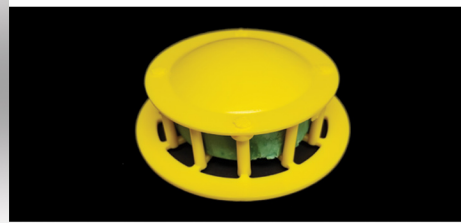

Defender

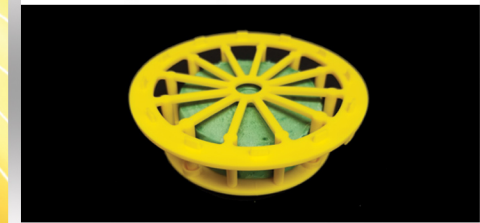

HOW IT WORKS

As liquid runs over the FloorSink Defender puck mechanism, it will start to gravitate under dome to slowly release the bacterial puck into the floor sink. By continuously dosing the drain, it will destroy all the grease, oils, and fats, along with odors, in the drain pipes. No more clogged drain pipes!

DOME TOP VIEW

BOTTOM VIEW

SIMPLE TO USE:

Place one FloorSink Defender puck on top or side of drain cover in floor sink. As liquid keeps hitting the bacterial puck, it will start shrinking. Replace with new one when puck is fully dissipated.
